COMPANY PROFILE

ACOUSTIC INSPIRATION

Ecological, robust and flexible high-performance sound absorbers made from recycled PET bottles, tailor-made for individual solutions to increase comfort and room quality in architecture, gastronomy, creative industries, open office spaces, school buildings, swimming pools, hotelery and your home. 100% Swiss design, 100% zero waste.

Made from 74 PET bottles per square metre, we process our **ECHOJAZZ** EchoBoards® into functional design elements. The soft, felt-like feel matches a wide range of natural materials such as stone, concrete, wood, metal and glass. **ECHOJAZZ** products are fire protection certified and available in up to 34 colours. Staged as a real eye-catcher or cleverly concealed - **ECHOJAZZ** improves the feeling of space in a noticeably pleasant way and with a lasting effect.

ECHOCURTAIN®

ECHOCOVE® DESK

ECHOTOWER®

SUSTAINABILITY BY DESIGN

To noticeably improve well-being and room quality, we create high-performance sound absorbers for architecture, gastronomy, creative industries, open office spaces and your home. Our ready-made products are designed for you in Kriens and have the highest standards of design and simplicity.

More ecological, more robust and more flexible in use than any other comparable product: all our products are based on the use of durable high-tech felt made from 100% PET. It was our upmost goal to ensure that the ECHOJAZZ products contain the highest possible proportion of recycled PET material and that the result is deceptively close to the beauty and properties of traditional wool.

Our product is for your project: We take care of individual and tailor-made solutions that address a wide range of projects and offer a large range of smart standard products.

And after the project is before the project: Through our stewardship programme, we can recycle 100% of used ECHOJAZZ products.

ACOUSTICS AND ENVIRONMENT

At ECHOJAZZ, we combine sustainability with the simplicity of design of highest and most vanguard standards. In order not to burden our nature, only the cycle comes into question for us: recycled raw materials, recyclable products, zero waste.

From disposable plastic to high-quality end products for the design industry: for our products we use 100% PET with a minimum of 50% recycled PET. Compared to the production of virgin PET, the use of recycled PET saves up to 84% of the energy. Individual products are complemented with recycled and recyclable steel

Closed loop: ECHOJAZZ is the only manufacturer to offer a take-back programme for all products. This means that all products can be returned for recycling at the end of their life cycle.

100% Zero Waste: We generate raw material for new products from used products and the residual material created during production.

On to the emission-free future: ECHOJAZZ products are already processed locally in Kriens, and we aim to have as many raw materials as possible manufactured as close to our site as possible.

HIGH PERFORMANCE

The world is changing at breakneck speed: space and tranquillity are becoming rare commodities. Whether in a creative open office, in a simple waiting room or in trendy restaurant concepts - people should feel comfortable in all rooms. We offer solutions that improve heavily frequented and acoustically stressed rooms: noticeably, audibly, sustainably.

Design without compromise: The time of carpet wallpaper and thick curtains in dim conference rooms is over. We will contain acoustic disturbance elements in every room without restricting modern design visions and architecture.

Sustainability without compromise: The construction industry is one of the biggest waste generators on our planet. This must change. We start with a product that is 100% recyclable. We achieve the UN Sustainable Development Goals (SDGs) for responsible consumption and production.

Unlimited inspiration: It is in the hands of the creative industries to reinvent flawed materials, products and business models, to model sustainability and inspire people. Let's get started!

**SOUND-ABSORBING**

The open and compressed felt structure is 40% thinner than comparable high-performance absorbers.

**ROBUST**

Very dimensionally stable, tear-resistant and cleanable without residues.

**REGULATING**

Pleasant indoor climate thanks to balancing temperature and humidity.

**EASY TO PROCESS**

Individually cut on the CNC cutting plotter, easily customisable on site.

**FIRE SAFETY**

European fire protection classification: B-s1/s2, d0, hardly any smoke development and no burning dripping.

**MOLD-FREE**

Because the fibre does not absorb water, the EchoBoard® dries very well.

**EMISSION-FREE**

Does not emit hazardous fibres or paint particles.

**LIGHTFASTNESS**

The fibres are dyed in the liquid state and do not fade.

The robust and easy-care basic elements EchoBoard® and EchoCoustic® can be used for a large number of individual design ideas and allow creative wishes regarding shapes, colours, perforation and areas of application.

ACOUSTIC MATERIAL

ECHOBOARD®

EchoBoard® is the basic material for optimal room acoustics. All ECHO**JAZZ** acoustic ceilings, acoustic luminaires, acoustic walls and acoustic room dividers are produced from this absorber. It can be processed in many ways to meet ever new creations and customer requirements. The ECHO**JAZZ** development team is happy to help develop customised solutions according to design proposals or DWG cutting plans. There is a choice of the classic 24mm or thinner 12mm. ECHO**JAZZ** offers its own mounting kits for easy installation.

COLOURS ECHOBOARD® 24MM

Due to the nature of the material, surface and colour deviations are possible.

ECHOBOARD® 24MM

*Discontinued. Colour available from stock while supplies last or on request with a minimum order quantity.

ECHOCOUSTIC®

The special EchoCoustic® absorber is the ideal material for direct mounting on walls or ceilings without spacing or substructure. The 3-layer EchoCoustic® achieves an excellent absorption levels of α_w 0.80 and NRW 0.85 with a thickness of only 25mm. EchoCoustic® can be easily applied with spray adhesive, the white core material remains intentionally visible or concealed by a profile frame. EchoCoustic® is available in 34 colours, as an additional design element a two-colour effect can be created by spacing the panels.

ACOUSTIC-CEILINGS

Ceilings of rooms often offer the most space for optimising room acoustics. ECHO**JAZZ** acoustic ceilings allow sound absorption for the highest demands, are adapted to the millimetre and can be optimally integrated into any room architecture.

ECHOORBIT® / ECHOLED® ORBIT

The EchoOrbit® ceiling sail is the perfect solution to acoustical calm noisy rooms. Three-dimensional diamond facets dampen the noise level and act as a diffuser for sound waves. Additional elements can be added seamlessly thanks to the hexagonal shape, allowing for stunning ceiling designs with spectacular arrangements and colour combinations. Installation is efficient thanks to only one height-adjustable suspension per element and supplied fasteners.

Say goodbye to unwanted noise and immerse yourself in a heavenly, futuristic silence with EchoOrbit®.

ECHOBaffle®

EchoBaffles® suspended vertically from the ceiling combine efficient acoustic well-being and striking design in open ceilings. It is visibly different from conventional ceilings. The open ceiling concepts also ensure the integration of the building structures in terms of climate technology while optimising the room acoustics at the same time. The inlays are plugged together on site and hooked into the grid ceiling without tools. The very light grid inlays can be easily removed, allowing easy access for maintenance of the building services.

The high acoustic performance of EchoBaffles® effectively dampens sound and “audibly” upgrades rooms with high noise levels. As a customised solution with individual design, the acoustic ceiling becomes a special eye-catcher and lends the room a lot of dynamism.

EchoBaffle® allows ceilings ranging from understated simplicity to dramatic sculptural shapes. The creations of the ECHO**JAZZ** designers are only a starting point, we are happy to work out individual designs on customer request. Complete reusability after use guaranteed – zero waste!

ACOUSTIC-LIGHTING

Lighting and room acoustics in one: sound-absorbing acoustic luminaires allow individual room design with maximum effect. The **ECHOJAZZ** range includes minimalist integrations with ceiling canopies as well as stand-alone luminaires with a striking design.

The image shows a minimalist office space. A white desk is positioned against a grey concrete wall. On the desk, there is a black acoustic sail with a white geometric pattern. A potted plant with large green leaves sits on the floor next to the desk. The lighting is soft and even.

ECHOLED® SITAS

For maximum comfort at the workplace, EchoLED® SITAS has a luminous field integrated into a high-performance acoustic absorber. The recessed light with microprismatic cover sits in the centre of the acoustic sail. It is produced tailor-made by ECHO**JAZZ** with a large range of shapes and sizes available in our 21 colours.

Thanks to the many options, the acoustic light can be optimally integrated into a design concept. The combination of light quality, functionality and acoustic well-being ensures optimum ergonomics for employees.

ECHOAMBIENT® COCOON

The EchoAmbient® COCOON lifestyle ceiling lights give every room a unique ambience. Not only acoustically, but above all through beautiful light and shadow effects. The fan-like slats of the COCOON model give the luminaire a futuristic shape. Almost two square metres of the class A acoustic absorber ensure very efficient sound absorption.

The EchoAmbient® enables interior designers to improve acoustics at the same time as they are creating the lighting concept. The E27 socket offers full flexibility in the choice of light source. The lamp with its cocoon-shaped design is available in 21 expressive colours.

ECHOAMBIENT® CONE

The EchoAmbient® CONE lifestyle ceiling lights give every room a unique ambience. Not only acoustically, but above all through beautiful light and shadow effects. Behind the new design of the lampshades is the new development from ECHOJAZZ - the Stretch-Cut. This special cutting pattern not only creates the perforations, but also transforms our EchoBoard® into a stretchable acoustic material.

The E27 socket allows for maximum compatibility in bulb selection. The lamps shown here have a conical shape and are currently available in 3 sizes and 21 expressive colours. In combination with different frame elements, a variety of other shapes and sizes can also be designed. EchoAmbient® lamps allow planners and architects to give free rein to their creativity when it comes to acoustic lighting design. Challenge us!

ECHOLED® CONE

The EchoLED® CONE acoustic pendant light is ideal for open spaces with decorative requirements. The classic cone-shaped lampshade made of EchoBoard® effectively dampens sound. The quality spotlight with black reflector achieves a brightness of minimum 1680 Lumens, with a power consumption of an energy-efficient 20 watt.

EchoLED® CONE is available in five sizes, the lampshade made of PET acoustic material contains up to 360 recycled PET bottles. The ceiling lamp is particularly appealing thanks to the different material thicknesses, the 21 expressive colours and varying designs.

ACOUSTIC-WALLS

Sound absorbers for wall mounting are an effective alternative to acoustic ceilings, especially in small and narrow rooms: space-saving, individually designable and flexibly applicable, acoustic walls offer sophisticated solutions.

ECHOBaffle® WALL

EchoBaffle® WALL is a new type of wall absorber with three-dimensional slats that come to life as you walk by. EchoBaffle® WALL opens up a new field for acoustic wall design. With changing viewing angles, three-dimensional shapes become visible and disappear again, particularly effective on long walls or corridors.

The EchoBaffles® impress with their simple installation using a tool-free plug-in system. The open structure leaves room for building technology such as sensors, switches or sockets. In addition, individual EchoBaffles® can be removed very easily if required. Discover the new wall solution, which we offer in four designs up to 2.80 metres high.

ECHOFIELD® ORNAMENT

EchoField® ORNAMENT is the perfect solution for a striking and practical wall design. The wall panel can be customised with individual perforations for an impressive look. Alternatively, the ornament can also be designed as a three-dimensional pattern with raised or lowered areas.

With its magnetic substructure, it offers versatile application possibilities and is ideal for covering uneven and fragmented walls. Thanks to the wall spacing, improved sound absorption is achieved, which positively influences the room acoustics. The quick-release system ensures easy access to areas behind it, such as facility services.

The EchoFiel® ORNAMENT wall panel is made recycled PET, which not only makes it environmentally friendly, but also gives it excellent durability and longevity. Design your interiors with EchoField® wall panels exactly as you want them, even with your own design

ECHOFIELD®

The EchoField® panels are fixed with a cavity to the wall and provide optimal acoustic performance especially in small and narrow rooms. They are an alternative to EchoSail® ceiling sails, with which they share dimensions and shapes. They are mounted using a powder-coated metal frame that is simply plugged in and suspended using a wall profile.

ECHOMONOC®

EchoMonoc® is suitable for large-area wall applications without visible joints. For improved acoustic performance, it is recommended to use the 24mm thick option. ECHO**JAZZ** absorbers made of recycled PET are extremely robust and suitable for regular cleaning and disinfection. Installation is quick and easy with EchoGlue® adhesive contact spray.

Indented carvings break up the monochrome surface. This finishing method creates an indented structure that gives each room its own character.

ECHOCOUSTIC® ACCENT

EchoCoustic® with V-shaped cuts makes the white high-performance absorption layer visible. This creates special line designs and thus accentuates in the truest sense of the word. The special EchoCoustic® absorber is the ideal material for direct application to walls or ceilings without spacing or substructure. With its three layers, it achieves an excellent absorption coefficient of α_w 0.80 and NRC 0.85 with a thickness of only 25mm. The absorber made of recycled PET is extremely robust and suitable for regular cleaning and disinfection. Installation is quick and easy with EchoGlue® contact spray adhesive.

The design of large-area acoustic walls takes on a new dimension. The high-contrast recesses allow for spectacular patterns, from existing designs to completely customised creations.

ACOUSTIC-PARTITIONS

Partition walls with sound insulation make it easy to divide rooms and optimise room acoustics in offices as well as in all other living and working environments. Available as mobile or permanently installed elements, they offer countless possibilities for room design.

ECHOCURTAIN®

As an acoustic room divider in an open-space office, the EchoCurtain® in 12mm and 24mm material thicknesses offers a flexible and transparent solution. The EchoCurtain® is suspended directly from the ceiling by means of a steel cable suspension, or optionally with a rail system. The acoustic room divider hangs seemingly floating in the room and provides a specific touch with cut-out perforations.

ECHOCOVE® MOVE

Movable partitions allow open-plan offices to be temporarily separated and acoustically insulated. The lightweight EchoCove® MOVE solution offers a wide range of products that come in sizes up to 180cm x 180cm and in many colours. Thanks to the high-quality steel base and the castors with stoppers, the acoustic panels can be easily moved around the room and safely parked.

ACOUSTIC-FURNITURE

Design and function combined in one: acoustic furniture are utility and design elements made of EchoBoard® for improving the sound environment in rooms of all kinds.

A photograph of a concrete wall with a purple acoustic panel and wooden shelves. The panel is a large, irregular shape with a textured surface. Two wooden shelves are mounted on the wall, one above the other. A small potted plant is on the top shelf, and a white bowl is on the bottom shelf. The wall is made of concrete with visible joints and some staining.

ECHOCRATE®

EchoCrate® is the elegant acoustic solution for storage space in a small area. The EchoBoard® wall panel can be configured in any colour and shape and can be used in a wide variety of areas. The seemingly floating wall shelf is mounted on a powder-coated metal frame or a customised solution.

For the first time, the design combines two recycling concepts of beverage packaging, PET bottles and wine crates. Recycled PET was used to produce the decorative acoustic board and the practical shelves are made from upcycled wooden crates.

ECHOTOWER® SQUARE

The EchoTower® is the pioneering product in zero noise and zero waste for any space. The acoustic column is cut from a sheet of EchoBoard®, the high-performance absorber made from recycled PET bottles. But that's not all. With a Zero Waste goal, ECHO**JAZZ** products are taken back and shredded into EchoFlakes® along with offcuts. Filled with these flakes, the EchoTower® increases acoustic well-being and closes the material cycle. The EchoTower® requires no assembly. A base, with or without castors, made of powder-coated sheet steel is optional.

ECHOTOWER® ROUND

The EchoTower® is the leading product in zero noise and zero waste for every room. The acoustic column is cut from a single piece of EchoBoard®, the high-performance absorber made from recycled PET bottles. But that is not all, with a zero waste target, ECHO**JAZZ** products are taken back and shredded together with offcuts to produce EchoFlakes®. Filled with these flakes, the EchoTower® increases the acoustic comfort and closes the material cycle. The EchoTower® is freestanding. A stand base, with or without wheels, made of powder-coated steel is optional.

The acoustic column with relief structure is an eye-catcher that achieves outstanding absorption values and ensures well-being. The recyclable EchoTower® stands for sustainability by design without compromise - with more than 465 recycled PET bottles per tower.

MCART

The **MCart** workstation offers the combination of personal focus space with mobile adaptability. Its compact dimensions make it suitable for working in an open office as well as a home office. The starting point for the design is an open steel frame. **ECHOJAZZ** panels define a semi-enclosed workspace with optimal sound insulation, simple body and colour accent. The acoustics in the overall space are also significantly improved. A gas lift column allows the height of the worktop to be adjusted from 70 to 112 cm in a matter of seconds. From standing to sitting and vice versa in real time.

ECHOCARRY

The EchoCarry is an office organiser for personal equipment. At the workplace, laptop, accessories, office materials and private things are always well tidied and easily at hand thanks to two storage positions. The integrated handle allows the toolbox to be quickly stored in a compartment or cupboard at the end of the working day.

The elegant office companion is made of the acoustic absorber EchoBoard® around a stable wooden board made of European birch. In use, it is very quiet and muffles ambient noise. The EchoCarry symbolises the focus on ergonomics in the modern mobile working environment.

ECHOB[®]

In the Open Office, telephone calls and video calls at the workplace can be disturbing. The sound-protected EchoBox[®] ensures privacy and less disruptive noise. A room within a room for short and focused conversations, while standing or sitting. Thanks to the integrated height-adjustable shelf, there is also room for documents or a laptop. The conversation booth can be assembled in no time without tools. Its 7 parts weigh only 42kg.

The EchoBox[®] is a Swiss product that resulted from an intensive development cooperation between SYMA Profile and Fastening Technology and ECHO**JAZZ** Acoustic Absorbers.

We build Acoustic Inspiration.

COLOURS

Let yourself be inspired by our colourful selection of colours. The fibres dyed in a liquid state do not fade and are very colourfast. For larger projects, we will even be happy to create your personal colour shade.

COLOURS

Due to the nature of the material, surface and colour deviations are possible.

You can always find the latest colour moods online at www.echojazz.com/colours

*Discontinued. Colour available from stock while supplies last or on request with a minimum order quantity.
